

client autoexpansion and hostname resolution (客户端自动扩展和主机名称解析), 147

in-flight modification of (转发过程中的修改), by proxies (通过代理转发), 147

internationalization (国际化), 389 ~ 391

resolution (解析), 144 ~ 150

proxy vs. server (代理与服务器的对比), 144

with a proxy (通过代理转发), explicit (显式), 149

without a proxy (没有代理), 148

rewriting (重写), 302

schemes (方案), 499 ~ 504

URLs (uniform resource locators) (统一资源定位符), 6, 23 ~ 42

advantages of (优点), 25

aliases (别名), 219

augmentation (增强), 126

automatic expansion (自动扩展), 34

canonical form (规范形式), 37

canonicalizing (规范化), 220

character sets (字符集), 35, 35 ~ 38

CURLs, 465

examples (实例), 13

fat URLs (胖 URL), client identification using (用其进行客户端识别), 262

informational resources (信息化资源), 41

portability (可移植性), 35

PURLs, 40

relative URLs (相对 URL), 30 ~ 34

restricted characters (受限字符), 36

schemes (方案), 7

schemes (see schemes) (方案, 参见方案)

shortcuts (快捷方式), 30

structure (结构), 24

syntax (语法), 26 ~ 30

URLs, as a subset of (作为子集), 24

variants [变体 (备用候选)], 395

virtual hosting (虚拟主机托管), paths (路径), 415

URNs (uniform resource names) (统一资源名), 7, 40

standardization (标准化), 41

US-ASCII character set (US-ASCII 字符集), 379

user agents (用户代理), 19

user component (用户组件), URLs (URL), 27

user home directory doctoots (用户主目录 doctoot), 122

User-Agent headers (User-Agent 首部), 225, 259, 528

user-tracking systems (用户追踪系统), content injection (内容注入), 405

UTF-8 encoding (UTF-8 编码), 382

V

validators (验证器), 362

Last-Modified dates (Last-Modified 日期), using (使用), 181

strong and weak (强弱), 181, 363

variable-length codes [可变长 (变宽) 编码], 372

variable-width modal encodings (可变宽有模态编码), 381

variable-width nonmodal encodings (可变宽无模态编码), 381

Vary headers (Vary 首部), 402, 529

Vermeer Technologies, Inc. (维美尔技术公司), 424

version numbers (版本号), HTTP messages (HTTP 报文), 50

Via headers (Via 首部), 151 ~ 154, 529

gateways and (网关), 153

privacy and security (隐私和安全), 154

request and response paths (请求和响应路径), 153

Server response header fields (Server 响应首部字段), 154

syntax (语法), 152

video/* MIME types (video/* MIME 类型), 568
